

Data Sheet

Foil Holder

Optional for **ZIEGLER-FT** Series Adhesion Peel Tester

Release Test

Adhesive Peel Test

Usage

The foil holder is used for foils or samples with an irregular shape.

Usage: Release Test

The foil holders are used to fix an adhesive strip directly on the test table. This allows the release material to be peeled off the adhesive strip directly.

Easy change of test methods

Testing with test plates is also possible when the foil holder is mounted at the same time. This makes it easier to quickly switch between different test methods.
